

Sorell

LOCAL GOVERNMENT AREA

Health is closely tied to our daily environment. This Community Health Check presents information about the environmental, social and economic state of the Sorell local government area.

Community Health Check 2025

About us

	Sorell LGA	Tasmania
Our population	16,734	557,571
Aboriginal population	 4.8%	 5.4%
Population by age		
Population by gender	49% Male 51% Female	51% Male 49% Female
Median age in years	42	42
Born outside Australia	 17%	 21%

Sources: Our population, Aboriginal population, Population by age, Population by gender, Born outside Australia, Median age in years: Australian Bureau of Statistics, 2021 Census All persons QuickStats, Local Government Areas, Sorell

Social and economic conditions

Education

The proportion of people in the Sorell LGA who have completed Year 12 and above is similar to the proportion for Tasmania overall.

PER CENT OF ELIGIBLE POPULATION WHO HAVE COMPLETED YEAR 12 AND ABOVE

Higher education levels are associated with better health outcomes.

Unemployment rates

The rate of people in the Sorell LGA who are unemployed is less than the rate in Tasmania overall.

Median weekly income

Weekly income per household is higher in the Sorell LGA than in the rest of Tasmania.

Motor vehicles

Ninety-six per cent (96%) of households in the Sorell LGA have one or more motor vehicles.

Home ownership

Fewer people in the Sorell LGA own their homes outright, compared to the rest of Tasmania.

	Sorell	Tasmania
Owned outright	36%	37%
Owned with mortgage	43%	33%
Rented	18%	26%

Healthy living

Self-reported health

Thirty-eight per cent (38%) of Sorell residents rated their health as “excellent” or “very good”. This is similar to the rate for Tasmania.

ADULTS REPORTING THEIR OWN HEALTH AS ‘EXCELLENT’ OR ‘VERY GOOD’

How people feel about their own health, their state of mind and their life in general is a common measure of health. (Australia's Health 2018. AIHW)

Risk factors

Risk factors are conditions or behaviours that make it more likely people will get a chronic condition or health problem.

	Sorell	Tasmania
 Overweight/obese body mass index (BMI)	73%	62%
 Current smoker	17%	15%
 Daily/occasional vaping	3%	3%
 Single occasion risky drinking (>4 alcoholic standard drinks)*	34%	37%
 Insufficient moderate/vigorous activity [†]	27%	24%
 Did not meet recommended daily vegetable intake [^]	91%	91%
 Did not meet recommended daily fruit intake [^]	65%	61%

In the Sorell LGA, around 17% of people aged 18 years and over, are daily and current smokers, which is lower than the rate for Tasmania.

Healthy living

Psychological distress

Fewer adults in the Sorell LGA are likely to experience high or very high levels of psychological distress compared with Tasmania overall.

PEOPLE WITH HIGH OR VERY HIGH LEVELS OF PSYCHOLOGICAL DISTRESS

Psychological distress is a term used to describe unpleasant feelings or emotions that can influence how we function in daily life.

Health care

Immunisations

Ninety-seven percent (97%) of children in the Sorell LGA are fully immunised by the age of five, which is higher than the rate for Tasmania.

GP and emergency department encounters

Eighty-five percent (85%) of people from the Sorell LGA saw a general practitioner for their own health in the past twelve months*.

On average each year during 2021-2023, 2,290 individuals from the Sorell LGA visited an ED (131 people per 1,000 population[^]), with an average of 4,098 presentations per year (235 ED presentations per 1,000 population[^]).

[^]Estimated population for June 2022 = 17,430

Sources: Psychological distress and GP encounters: Tasmanian Population Health Survey LGA Supplementary Data Tables 2022; Immunisations: Primary Health Information Development Unit, Social Health Atlas of Australia: Local Government Areas; Compiled based on data provided by Australian Childhood Immunisation Register, Medicare Australia, 2021.

Emergency department encounters: Department of Health and Human Services, Health Central Data Warehouse, Tasmania. Analysed by Primary Health Tasmania; accessed March 2025.

*Individual totals may be higher due to patients potentially visiting more than one practice outside an LGA area or possible de-identification linkage errors from patient administration extraction software.

Health outcomes

Public hospital admissions

During the five years from 2019-20 to 2023-24 there were 23,582 admissions to Tasmanian public hospitals from the Sorell LGA area, with 10,431 overnight stays.

NUMBER OF PUBLIC HOSPITAL ADMISSIONS BY AGE GROUP AND GENDER 2019-20 TO 2023-24

TOP 10 PRIMARY HOSPITAL DIAGNOSIS ^{*A}	TOP 10 CHARLSON COMORBIDITIES ^{AA}	TOP 10 POTENTIALLY PREVENTABLE HOSPITALISATIONS
Care involving dialysis	Renal disease	Diabetes complications
Liveborn infants according to place of birth	Any malignancy, including lymphoma and leukaemia, except malignant neoplasm of skin	Chronic obstructive pulmonary disease
Pain in throat and chest	Chronic pulmonary disease	Cellulitis
Single spontaneous delivery	Cerebrovascular disease	Congestive heart failure
Other cataract	Congestive heart failure	Urinary tract infection
Adjustment and management of drug delivery or implanted device	Myocardial infarction	Type 2 diabetes
Abdominal and pelvic pain	Diabetes with chronic complication	Iron deficiency anaemia
Single delivery by caesarean section	Metastatic tumour	Type 1 diabetes
Depressive episode	Rheumatic disease	Ear, nose and throat infections
Other chronic obstructive pulmonary disease	Diabetes without chronic complication	Convulsions epilepsy

^{*}Excludes diagnoses coded as "persons encountering health services in other circumstances" and "other medical care" which cover a wide range of diverse categories and are as such less useful in understanding reasons for hospitalisations.

Health outcomes

[^]The *primary hospital diagnosis* is the diagnosis established after study (for example, at the completion of the episode of care) to be chiefly responsible for causing the episode of admitted patient care. It is essentially the main reason someone needed to be admitted to hospital.

^{^^}Patients admitted to hospital often have other comorbid conditions, which may or may not be related to their diagnosis. The *Charlson Comorbidities Index* classifies 17 comorbid conditions which may influence mortality risk.

Causes of death

During 2018-2022 coronary heart disease (11%), lung cancer (6%), chronic obstructive pulmonary disease (5.5%), dementia including Alzheimer disease (5.5%), and cerebrovascular disease (5%) were the leading causes of the 555 deaths in the Sorell LGA area. The age standardised death rate in 2022 was 516 per 100,000 compared with the overall age standardised rate of 683 for Tasmania.
